

NEW MEXICO VIRTUAL COURSE CONSORTIUM (NMVC²)

MICHAEL OGAS

2:00 P.M.

This is an informational presentation showcasing the New Mexico Virtual Course Consortium (NMVC²). NMVC² is a growing state-led provider network of public districts and charters who serve as supplemental course providers to students across the state through a memorandum of understanding (MOU) with the student's district or charter of residence. The goal of the consortium is to support charters and districts who need "instructional options" to help keep their students enrolled in their district/school. The consortium provides a number of virtual and hybrid options for grades K - 12, including core courses, electives, dual credit, and other specialty course offerings.
